- Express
- Sequelize
- Handlebars JS
- NPM
- Version Control with Git + GitHub
- AJAX & RESTful APIs
- Detail-oriented

PROFESSIONAL EXPERIENCE

UNC CHARLOTTE CODING BOOTCAMP, CHARLOTTE, NC

OCTOBER 2017 - FEBRUARY 2018

Project 1: Ryde or Drive <https://github.com/GregoryJimR/Ryde-or-Dryve.git>

An app that takes a destination and user vehicle data and returns wait times and rates for Uber and Lyft and driving oneself. Utilizes Firebase, various Google APIs, Uber API and Lyft API. Deployed on GitHub

Project 2: Duello <https://github.com/GregoryJimR/Rise-to-the-Challenge.git>

An app that allows users to create challenges and issue them to others and requires video proof of completion. Utilizes MongoDB, Materialize and various node packages to assist with email invitations, routing and more. Deployed in Heroku.

Project 3: Convoy <https://github.com/GregoryJimR/convoy.git>

An app that allows individuals to track the location of various party or "convoy" members. UI is built in React JS. Includes an express server to handle email invitations via Sendgrid. Geolocation is accessed via HTML 5 browser API. User authentication, user profiles and "convoy" groups are managed in Firebase. React JS rendering and Firebase listeners allow map via Google Map API to re-render when any user Geolocation changes. Deployed in Heroku. Plans for future development and marketing.

In Development: Name TBD

An app that allows tracking of backpackers in groups. To be built in React Native. Will periodically check for signal and will collect pertinent data like weather advisories to be saved to the device. This will give the user the most up-to-date data in weak signal environments.

Housing Account Manager

- Oversee daily operations of store
- Nightly deposit handling and Closing/Opening of store
- Manage a team of less than 10 employees
- Dispute resolution and promote customer loyalty through exceptional customer service
